

Data Science Project Outline: Multiple Linear Regression

Project Title: [Student to choose based on dataset]

1. Data Understanding

- **1.1** Describe the dataset and its features
- **1.2** Explore basic statistics and summary of the dataset

2. Data Exploration

- **2.1** Visualize the distribution of key features
- **2.2** Identify correlations between features

3. Data Preprocessing

- **3.1** Handle missing values
- **3.2** Remove duplicates
- **3.3** Handle outliers

4. Model Training

- **4.1** Split the data
- **4.2** Train the model

5. Model Evaluation

- **5.1** Use appropriate metrics to evaluate model performance
- **5.2** Provide visualizations of model performance

6. Conclusion and Future Work

- **6.1** Summarize findings and model performance
- **6.2** Suggest potential improvements and future work

Groups: Maximum 3 students

Deadline: Tuesday, January 12, 2026

Location: Campus 3
